

Important: In Dialux and other light calculation programs you can fill in the poleheight. You should however take into account the height of the Luminair.

Example: Pole height 4.0 meter + Luminair height 0.45 meters = 4.45 meters.

Results as shown below:

Projectbeheer

Armatuur   Positie / rotatie   Montagehoogte   Naam

Positie

X: 9.329 m   Y: 8.614 m   Z: 4.45 m

Rotatie

X: 0.0 °   Y: -0.0 °   Z: -0.0 °

begrote rekening

Em armaturen: 5 lx

Em totaal: 5 lx

The mounting and lightsource (usefull -lower) height are now as shown below.
